

TabLines TSG

Tablet protective housing for all available tablets

Description

Elegant design. The TabLines TSG tablet protective housing presents the tablet in a very elegant way. Clean lines, a gentle but present appearance, a high-quality powder coating, as well as the variant made of real wood make the tablet case to an enrichment for every place where content is presented.

Optimized for public use. The TSG is available as a theft-proof version, made of stainless steel or as a non-theft-proof variant, made of real wood oak. The TabLines TSG protective housing impresses with minimalist design and is a high-tech statement in the room. A visually compelling and durable product. The protective housing can be mounted directly on the wall or combined with a VESA-compatible mounting.

Use in all areas possible. In public areas, the tablet holder can be used for example in universities or colleges as a digital notice board, in museums, galleries and at trade fairs as a multilingual exhibition opportunity or in shops as a relief for employees to check current warehouse stock, prices, etc. in time. With its innovative design the case protects the tablet from unauthorized access.

TabLines TSG
